# Blackinton®

Although Blackinton has a specific Breast Cancer Awareness product line, they can finish most of their 1,000's of badge styles in a Pink Finish.

Pink badges make a bold statement. Sorry, pink badges are only available with regular enamel, hard enamel can not be used with this finish.

If a pink badge is too strong for your liking, consider a badge in one of their standard finishes with an applied breast cancer awareness seal.

Since launching this program, we have donated over \$22,000.00, to the charities we support.

 Please call for pricing and ordering info.

FlexBadge® is a three-dimensional flexible metallic looking emblem that can be fully customized to replicate your badge, logo, or patch.

- Velcro, Heat Press, Cap Application
- Fully customizable: seals, finish, lettering
- "No" minimums for standard styles
- Lightweight, metallic in appearance
- Flexible, pliable for a comfortable fit
